Please be advised that the New Jersey Department of Health is in the process of revising New Jersey Administrative Code Title 8 Chapter 57 which covers Communicable Diseases and related topics. The current rule is set to expire on February 8, 2024.

To engage the relevant groups as early as possible, we are currently seeking the input of our stakeholders. While drafting these revisions, it is important to us that we are incorporating the feedback of those that the rule most influences.

Attached to this email, please find a slide deck detailing how to access the full text of the current rule, some of the larger changes that the Department intends to incorporate into the rule, and a link to a survey for you to provide any feedback you have on the changes or on the current rule. You can also find the survey at the following web address:

The Department invites all stakeholders and other interested parties to submit their feedback on this rule. The Department would appreciate receiving all comments no later than close of business on **May 31, 2023**.
