The Honorable Phil Murphy
Office of the Governor
P.O. Box 001
Trenton, NJ 08625

Dear Governor Murphy,

As more vaccines become available state wide, we would like to again bring to your attention our idea for mobile units to bring vaccines to elderly residents in adult communities. In recent weeks, many seniors in the 10th Legislative District who reside in 55 and older communities have contacted our office with concerns ranging from lack of appointments to difficulty accessing to vaccination sites.

Once again, we are respectfully requesting that your Administration establish additional opportunities for senior citizens to receive the vaccine, either from a mobile unit to be deployed to adult communities or authorizing vaccines be administered at a community clubhouse or another location within the development.

We commend the Ocean County Health Department and the Ocean County Freeholders who have worked tirelessly to meet the demand and vaccinate our residents as quickly as possible. They have overcome many challenges and efficiently vaccinated thousands of people in Ocean County during this unprecedented health crisis.

Currently in Palm Beach County Florida, mobile medical units that are used for COVID-19 testing are being proposed to administer the vaccines to their senior citizens. New York, Pennsylvania and Michigan are also considering this proposal in order to prioritize the senior population. New Jersey has an opportunity to lead the nation with an innovative and accessible alternative to vaccine supersites.

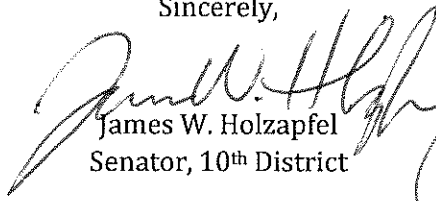

We are requesting your Administration immediately act on this unique opportunity to provide mobile units to deploy to adult communities and the ability to vaccinate on site. We must act now in order to stay ahead of this pandemic and continue to protect our senior population. Again, we respectfully request your assistance on this matter and look forward to working with

your office. Please contact our District Office at 732-840-9028 for any further questions or comments.

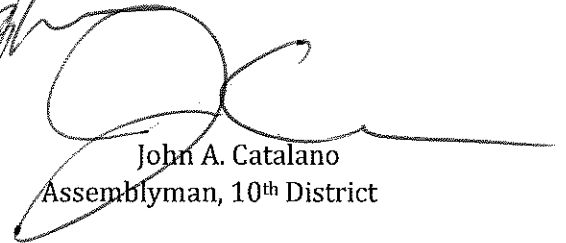

Sincerely,

Gregory P. McGuckin
